

## Free Reformed Church - Southern River

Development Type: Church  
Location: Southern River  
Local Government: City of Gosnells  
Current Status: Constructed and in Use

In 2002, Dykstra Planning initiated the process of approval for a new church to be built in a 'Bush Forever' area on Southern River Road. The Church was officially opened in 2007 after a thorough process of planning, negotiation and construction.

During the process, the application endured a rigorous procedure including detailed environmental assessments and planning considerations for the wider area. Dykstra Planning coordinated the planning work for this project and ensured that the application for planning approval met the standards of all relevant agencies involved.

The outcome of this extensive planning work resulted in the approval for the Free Reformed Church of Southern River to be developed.

Guided by the District Southern Plan for the area, the Southern River region will become a diverse precinct that will include aspects of residential, pedestrian-based retail, light industrial, commercial, rural and open space land uses. The area is set to be an exciting precinct, and the development of the Church is at the forefront of this.

Dykstra Planning are pleased to have undertaken the planning work for this project.
